

## Assessment Tomorrow & UKT&I Innovation and e-Assessment Seminars

Thursday 13<sup>th</sup> January 2011 the Mirage Hotel, Mumbai

Attendance by invitation only

To showcase how innovatory technologies can enhance and extend skills development, learning and the assessment process.

Technology is making a major impact on the ways that learning and assessment is delivered in the 21st century. Mobile learning and assessment is providing the opportunity to exploit the latest telecoms. The take up of e-Assessment is increasing world-wide and is defined as the use of technology to measure skills, knowledge and understanding. Within education (from the school room to the workplace), trainers, government agencies and assessment providers are actively engaged in using technology based learning and development solutions that enable them to provide reliable, flexible education and assessment for learners, students and employees. These seminars examine the leading edge of these developments and how they apply to the complete working and learning pyramid.

### This series of Seminars will address the following questions

- How to bridge the **skills gap** and cope with the increasing numbers and the demands of industry, customers and the economy?
- What are the innovatory approaches to Skills Development offered by 21<sup>st</sup> Century technologies?
- How can the technology assist to recognize and develop the right **talent**?
- Who will derive the maximum **benefit** from the new technologies of skills assessment and development?
- When can the **technology** provide reliable and cost effective measurements of skills and competencies?
- How can assessment and technology support **learning, training and professional development**?
